

Errata Lowie and Seton (2012)

Chapter 2, Page 23

The text under Activity 2.5 starts with the word “bigger”. This word should be on top of the page before “with instruction”.

Chapter 3, page 27

The note under Figure I.3.1 should say:

“In this picture you can see a so-called boxplot with the different quartiles. You can also see that SPSS has taken the extreme value to be an outlier, instead of including it in the boxplot itself. The bottom tail of the boxplot shows the first quartile. The middle two parts are the second and third quartiles with the median in de middle. The top tail of the plot shows the fourth quartile.”

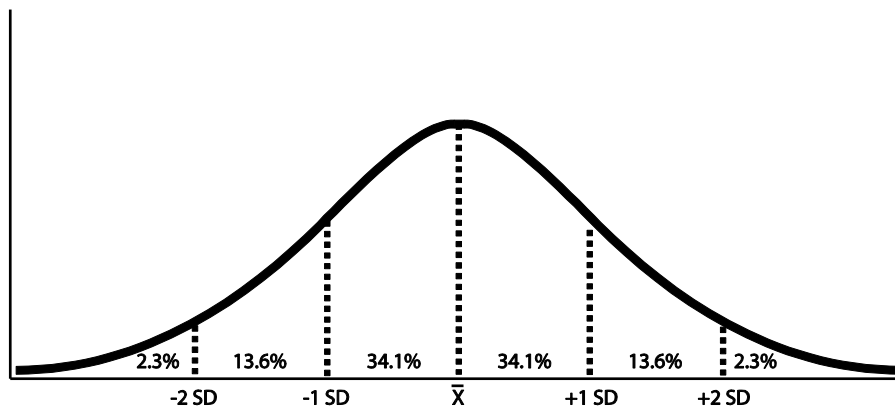

Chapter 3, page 35

In Figure I.3.6, the number 53 should be 51.

Chapter 3, page 35

“The percentage of scores between the mean score and 1 SD away from that mean is always 34.1%. Between one and two SDs from the mean we always find 13.6% of all scores. Higher than 2 SD above the mean is only 2.3% and lower than 2 SD below the mean another 2.3% can be found. These observations are summarized in Figure I.3.7”

Figure I.3.7 should then be as follows:

Chapter 6, page 76, case 3

120 learners of Hebrew should be 60 learners of Hebrew.

Practical 4, page 146

The file to open is not Prac3A, but Prac4_Optional.
