The Age of Migration 6th edition

International Population Movements in the Modern World

Hein de Haas, Stephen Castles, Mark J. Miller

International migration is one of the most emotive issues of our times, reforging societies around the world and shaping debates on security, national identity and sovereignty in profound ways. The expert authors of this book provide a truly global and interdisciplinary introduction to this perennially important topic, with chapters covering all of the world's regions and spanning the nineteenth century to the present day. Exploring the significance of migration in relation to recent events and emerging trends, from the policies of the European Union to the Great Recession, this text helps to shed light on the often large gap between the rhetoric and realities of migration.

Long established as the leading textbook on migration and used by students and scholars alike all over the world, this fully revised and updated sixth edition continues to offer an authoritative and cutting-edge account of migration flows, why they occur, and their consequences for both origin and destination societies.

'Theoretically sophisticated and empirically wide-ranging, The Age of Migration keeps on getting better with each edition. With new, revised and updated chapters this is essentially a new book. Whether as core or background reading, using this textbook in your migration course is a no-brainer.'

Maarten Vink, Maastricht University, the Netherlands

'The Age of Migration offers the most comprehensive guide to understanding global migration patterns, both historically and in the present day. Their critical assessment of the policies by which nations attempt to manage migration flows is a must-read for policy makers and the public alike.'

Douglas S. Massey, Princeton University, USA
