Economics for Business

2nd edition

Chris Mulhearn and Howard Vane, both at Liverpool John Moores University, UK

‘This is Mulhearn and Vane at their best. This second edition is both thorough and engaging and will be an asset for all students undertaking introductory economics.’ - Carole Doyle, Glasgow Caledonian University, UK

‘Mulhearn and Vane do an outstanding job of bringing the subject of economics to life. They show their readers how knowledge of economic concepts helps them understand the world of business.’ - Thomas Coskeran, Durham University, UK

‘This book is a great combination of three ingredients: an accessible writing style; a comprehensive set of real examples; and a culturally stimulating approach. I would definitely recommend it to students beginning their business studies.’ - Emanuele Tarantino, University of Bologna, Italy

Economics for Business is an engaging introductory text, full of examples and cases enabling students to grasp complex economic theory and understand its relevance in real-world business scenarios. Students will enjoy the clarity and wit of the writing style and benefit from the quirky learning features and illustrations.

Contents: Economics and Business • The Market • The Firm • Firms’ Costs and Revenues • Market Concentration and Power • Business and Government • Factor Markets • The Macroeconomy, Macroeconomic Policy and Business • Unemployment • Inflation • Economic Growth and Business Cycles • Stabilizing the Economy • International Trade • The Balance of Payments and Exchange Rates • Globalization • Glossary • Index

The Economics Companion

Graham Mallard, Marlborough College, UK

‘This is a superb guide to what the successful study of economics at university involves. It will be most helpful to anyone contemplating the study of economics.’ - Malcolm Sawyer, Professor of Economics, University of Leeds, UK

‘The Economics Companion should be recommended to any student of economics who wishes to get a richer and more nuanced introduction to our discipline than is typically provided in standard introductory texts and courses.’ - Nick Weaver, School of Social Sciences: Economics, University of Manchester, UK

An invaluable resource for those considering and starting degree courses in Economics. It introduces readers to the core theories and techniques of economics and presents some of the most interesting controversies and wider themes. It is an essential guide for those wanting to study the subject successfully.

Macroeconomics

Nils Gottfries, Uppsala University, Sweden

‘Nils Gottfries’ thoughtful, consistent and lucid exposition breathes fresh air into a macroeconomics textbook.’ - John Driffill, Birkbeck, University of London, UK

‘This is a great book. It uses a consistent theory throughout, explains it well, and does a tremendous job in confronting theory with data.’ - Steinar Holden, University of Oslo, Norway

‘This is a superb book! It contains a rigorous treatment of the New-Keynesian model combined with illustrative examples and interesting policy discussions. Students will find the book well-written and easily accessible.’ - Fredrik NG Andersson, Lund University, Sweden

‘This book is an excellent and innovative new textbook for intermediate macroeconomics.’ - Gianluigi Vernasca, University of Essex, UK

A new approach based on microfoundations combined with an essentially Keynesian policy analysis. Highly readable, direct style, with consistent treatment through the short and long run and the closed and open economy, and an international stance comparing theory with data for the Eurozone, UK and US. Up-to-date analysis of financial events.

Contents: Introduction • PART I: THE LONG RUN • Production, Prices and the Distribution of Income • Interest Rates and Investment • Consumption and the Natural Rate of Interest • Capital Accumulation and Growth • Wage Setting and Unemployment • Money and Inflation in the Long Run • PART II: THE SHORT RUN • The Interest Rate and Production in the Short Run • Economic Activity and Inflation in the Short Run • PART III: ECONOMIC POLICY • Monetary Policy • Fiscal Policy • PART IV: THE OPEN ECONOMY • Exports, Imports, and International Financial Markets • The Open Economy in the Long Run • The Open Economy in the Short Run • Exchange Rate Systems and Monetary Union • PART V: BUSINESS CYCLES, POLICY-MAKING, FINANCIAL MARKETS • Business Cycles • Institutions and Economic Policy • Financial Markets

Economics of Development

Theory and Evidence

9th edition

A.P. Thirlwall, University of Kent, UK

‘Thirlwall sets the standard for a rigorous undergraduate development text.’
Professor Gregg Huff, Senior Research Fellow, Pembroke College, University of Oxford, UK

The ninth edition of Thirlwall’s Economics of Development: Theory and Evidence (formerly Growth and Development) represents the most thorough revision of this classic textbook to date. For nearly forty years, it has offered students a clear, comprehensive and rigorous overview of the economic aspects of growth and development.

Microeconomics: Equilibrium and Efficiency

Thijs ten Raa, Tilburg University, The Netherlands

'This is an ideal microeconomics textbook for students who have a solid grounding in micro at the intermediate level. It contains the first and only integrated treatment of general equilibrium and input-output analysis.' - Marcus Berliant, Washington University in St. Louis, USA

'Professor ten Raa has succeeded in writing a lucid text that shows the wide applicability of standard theory and its normative implications for a more efficient organization of real world economies.' - Fred Schroyen, Norwegian School of Economics, Norway

'Coherent, well written, rigorous and sharp, with a clear focus, this book will give students an excellent sense for the nature and performance of the market economy.' - Joop Hartog, University of Amsterdam, The Netherlands

Microeconomics: Equilibrium and Efficiency teaches how to apply microeconomic theory in an innovative, intuitive and concise way. Using real-world, empirical examples, this book not only covers the building blocks of the subject, but helps gain a broad understanding of microeconomic theory and models.

Contents: PART I: ECONOMIC PRINCIPLES • Economic Building Blocks and the Importance of Elasticities • Scarcities and how they are Priced • PART II: THE DEMAND SIDE OF THE ECONOMY • Utility and Expenditures • Demand: Income and Substitution Effects • Measuring Consumer Well-being • PART III: THE SUPPLY SIDE OF THE ECONOMY • Production Analysis: Inputs, Outputs, Coefficients, and Productivity • Production Functions • Supply and Market Power • PART IV: BUILDING THE MODEL OF THE ECONOMY • Equilibrium • Efficiency Theory • PART V: PUTTING THE MODEL TO USE • Measuring Economic Performance • Market Forms and Competition Policy • Public Economics • PART VI: MARKET IMPERFECTIONS • Game Theory and the New Industrial Organization • Analyzing Uncertainty and Missing Information • Search, Transaction, and Switching Costs

368pp May 2013 9780230201132 $70.00 (C$81.00)

Institutional Economics: An Introduction

John Groenewegen, Delft University of Technology, The Netherlands, Antoon Spithoven and Annette Van den Berg, both at Utrecht School of Economics, The Netherlands

Institutional economics is an increasingly important area, verging into political science and sociology. This concise and lucid textbook, which assumes a basic understanding of neoclassical economics, introduces the key ideas, emphasizing the 'new' institutional economics but grounding readers in the traditional perspectives.

Contents: PART I: INTRODUCTION • What is Institutional Economics About? • PART II: THEORY • Theoretical Framework • Static Approaches to Institutions • The Dynamics of Institutions • PART III: PRIVATE GOVERNANCE STRUCTURES • Markets • Firms • Cooperation Between Firms • PART IV: PUBLIC GOVERNANCE STRUCTURES • State Intervention to Protect the Public Interest • Government Failures

324pp February 2010 9780230550742 $57.00 (C$65.50)
This new text offers sound pedagogy, economic rigor and policy-theory integration. It focuses on building intuition alongside appropriate mathematical formality, translating mathematical language into accessible economic narrative. It includes material on socioeconomic disparities in health, the obesity epidemic, and behavioral health economics.
A Course in Behavioral Economics

Erik Angner, George Mason University, USA

‘Written with great gusto and striking an elegant balance between forest and trees [this] is one of those rare textbooks that students pick up for fun. What more can you want?’ - Peter D. van der Meer, School of Economics, Utrecht University, The Netherlands

Written as a self-contained, one-semester text, this book presents behavioral economics (specifically behavioral theories of decision) by comparing and contrasting them to mainstream (neoclassical) economics. Ideal for advanced undergraduate students of economics, philosophy, psychology, marketing, and political science.

272pp  April 2012  Paperback  9780230304543  $48.00 (C$55.00)

An Introduction to Behavioral Economics

2nd edition

Nick Wilkinson, Richmond - The American University in London, UK and Matthias Klaes, University of Dundee, UK

‘The second volume expands, and brings up-to-date, this engaging and erudite introduction to the field of behavioral economics. By providing their own unique and interesting perspective on the material they review, the authors succeed at the difficult task of holding the reader’s interest while providing remarkably comprehensive coverage.’ - George Loewenstein, Carnegie Mellon University, USA

An Introduction to Behavioral Economics includes recent research, an overview of methodology and expanded material on rationality, behavioral game theory and the nature of the role of evidence in testing.

592pp  April 2012  Paperback  9780230291461  $72.00 (C$83.00)

Decision-Making

A Behavioral Economic Approach

Michal Skorepa, Charles University, Czech Republic

‘This book thoroughly describes and discusses important behavioural models of individual economic decision making. It will be useful to students and researchers within economics and related social sciences who wish to understand the many important results and insights from this exciting research area.’ - Anders Poulsen, Lecturer in Economics, School of Economics, University of East Anglia, UK

Decision Making provides a broad survey of the field of decision making from the perspective of the economics researcher. The book is divided into two parts, the first provides a concise and systematic overview of the field of decision research, and the second goes deeper into key topics and debates within the field.

400pp  January 2011  Paperback  97802302348250  $55.00 (C$63.00)

Applied Econometrics

2nd edition

Dimitrios Asteriou,
Hellenic Open
University, Greece and
Stephen G. Hall,
University of Leicester,
UK

'I wholeheartedly
recommend this
econometrics
textbook, which
was clearly written
with students’ needs
in mind.’ - Kaddour
Hadri, Professor of Economics, Queen’s University
Management School, Belfast, UK

The second edition of this highly successful text
refines existing strengths and adds significant new
material expanding the scope of the book and
making it a more flexible teaching tool. In addition
to providing instructions for performing all tests
in EViews and Microfit, the book now includes
instructions for STATA.

Econometrics by Example

Damodar Gujarati, Emeritus Professor, US Military Academy, West Point,
USA

‘When it comes to getting clear answers to my basic questions, I always
reach for Guj…I wouldn’t try to learn econometrics without the Guj.’ -
Student Reviewer, Amazon.com

‘Econometrics by Example is another innovative textbook by Professor
Damodar Gujarati. The numerous in-depth examples not only provide
greater insight for students and practitioners of economics, but will
also be useful for students in other areas of the social sciences.’ - Frank J.
F fabozzi, Yale School of Management, USA

Econometrics by Example is an introductory text for students who wish to focus
on practical applications of econometric theory. Each chapter contains one or
two examples that are discussed in depth. The example-led approach and engaging writing style are ideal for
students tackling the subject for the first time.

Contents: PART I: THE LINEAR REGRESSION MODEL • The Linear Regression Model: An Overview • Functional Forms
of Regression Models • Qualitative Explanatory Variables Regression Models PART II: CRITICAL EVALUATION OF
THE CLASSICAL LINEAR REGRESSION MODEL • Regression Diagnostic I: Multicollinearity • Regression Diagnostic
II: Heteroscedasticity • Regression Diagnostic III: Autocorrelation • Regression Diagnostic IV: Model Specification
Errors PART III: REGRESSION MODELS WITH CROSS-SECTIONAL DATA • The Logit and Probit Models • Multinomial
Regression Models • Ordinal Regression Models • Limited Dependent Variable Regression Models • Modeling Count
Data: The Poisson and Negative Binomial Regression Models PART IV: TOPICS IN TIME SERIES ECONOMETRICS •
Stationary and Nonstationary Time Series • Cointegration and Error Correction Models • Asset Price Volatility: The
ARCH and GARCH Models • Economic Forecasting • Panel Data Regression Models • Survival Analysis • Stochastic
Regressors and the Method of Instrumental Variables

MATHEMATICS FOR ECONOMICS

Mathematics for Economics
An integrated approach
3rd edition

Mik Wisniewski,
University of Strathclyde, UK

‘This book does a great job by teaching how mathematics used in economic models both reveals and is enlivened by economic intuition.’
- Sujoy Mukerji, Oxford University, UK

This book shows how mathematics is used in developing economic theory and in applied economic analysis. The text gradually develops the mathematical skills needed by students and allows them to progress at their own pace. A wide variety of examples shows how, and why, the application of mathematics has become essential to economists.

Essential Quantitative Methods
For Business, Management and Finance
5th edition

Les Oakshott,
University of Warwick, UK

‘The fifth edition is perfect for students on Business-related courses. The language and tone used throughout the book make it accessible for students without any previous exposure to Quantitative Methods.

Regular in-text activities and the self-tests on the excellent companion website help to boost student confidence in the subject.’ - Lee Fawcett, Newcastle University, UK

A great value, student-friendly introduction to quantitative methods. The book covers the essentials, whilst also appealing to more advanced students. Focused on problem-solving in a real business context, with plenty of pedagogical features and real world examples, students are guided through the subject clearly and methodically.

International Finance

4th edition

Keith Pilbeam, City University, UK

‘International Finance offers a comprehensive introduction to the subject – covering theory, policy and empirical situations. But the author also manages to succeed in adding that extra bit of understanding without ever becoming too technical.’ - Franc Klaassen, Associate Professor of International Economics, University of Amsterdam, The Netherlands

‘Both students and practitioners working through this book will gain an excellent grounding in the fundamental features of International Finance. I highly recommend this book to any reader.’ - Dennis Vink, Professor, Nyenrode Business University, The Netherlands

International Finance is an established and internationally renowned introduction to the subject for students. It draws on recent events to provide comprehensive coverage of traditional theories and new research relating to the balance of payments, exchange rate determination and the international monetary system.

Contents: Introduction • PART I: BALANCE OF PAYMENTS THEORY AND PRACTICE • The Foreign Exchange Market • The Balance of Payments • Elasticity and Absorption Approaches to the Balance of Payments • Macroeconomic Policy in an Open Economy • The Monetary Approach to the Balance of Payments • PART II: EXCHANGE RATE DETERMINATION: THEORY, EVIDENCE AND POLICY • Purchasing Power Parity and Floating Exchange Rate Experience • Modern Models of Exchange Rate Determination • The Portfolio Balance Model • Empirical Evidence on Exchange Rates • Fixed, Flexible and Managed Exchange Rates • PART III: THE INTERNATIONAL MONETARY SYSTEM • The International Monetary System • The Eurocurrency and Eurobond Markets • Currency Derivatives: Futures, Options and Swaps • International Policy Coordination • International Debt Crises • The European Monetary System and European Monetary Union • Currency Crises and the East Asian Financial Crisis • The Subprime Mortgage Crisis • Further Reading and Resources

Resisting Economic Globalization
Critical Theory and International Investment Law

David Schneiderman, University of Toronto, Canada

Is economic globalization irresistible? One of its main effects has been to shield financiers and investors from democratic processes deemed out-of-sync with powerful economic interests. This book is an inquiry into the ways by which citizens and states may be able to undo some of these constraints imposed by transnational legality.

Contents: Introduction • Hardt and Negri and the Immobilization of the State • Teubner and System Liberation • Habermas and Global Power Policy • Santos and Difficulty of Sustainable Resistance • Wolin and Democracy’s Debasement • Foucault, Ecuador and on Being ‘Freer Than They Feel’ • Conclusion

232pp June 2013 Hardback 9781137004055 $95.00 (C$109.00)

Palgrave Macmillan Socio-Legal Studies

Comparative Political Economy of Work

Edited by Marco Hauptmeier, Cardiff University, UK and Matt Vidal, Kings College London, UK

An edited book in the Critical Perspectives on Work and Employment series associated with the annual International Labour Process Conference. The book focuses on comparative work and employment relations research conducted within a broader political economy framework. Written by leading academics it contains cutting-edge research.

Contents: Introduction – Comparative Political Economy and the Labour Process; Matt Vidal & Marco Hauptmeier • PART I: THEORETICAL FRAMEWORKS • Do the UK and Australia have Sustainable Business Models?; Karel Williams • Varieties of Capitalism and Varieties of Crisis; Jason Heyes, Paul Lewis & Ian Clark • Postfordism as a Dysfunctional Accumulation Regime; Matt Vidal • The Social and Material Construction of the Financial Crisis; Marco Hauptmeier & Glenn Morgan • PART II: COMPARATIVE POLITICAL ECONOMY OF THE LABOUR PROCESS • Value Chains and Networks in Services – Understanding Labour Process Dynamics; Jörg Flecker • Greening Steel Work: Varieties of Capitalism, the Green Skills Agenda and the Greening of the Labour Process; Dean Stroud & Claire Evans • Coping with Job-Related Uncertainties – A Comparison of Precariously Working Women in East and West Germany; Melanie Booth • PART III: COMPARATIVE EMPLOYMENT RELATIONS • Intra-EU labour Migration and the Circumvention of National Industrial Relations Systems; Nathan Lillie, Ines Wagner & Lisa Bernsten • Employment Relations under External Pressure: Spain and Italian reforms in 2010–11; Guglielmo Meardi • Strikes in EU companies. Trade Union Effects in Different institutional Settings; Giedo Jansen & Agnes Akkerman • Board Level Employee Representatives in Norway, Sweden and Denmark; Inger Marie Hagen • PART IV: SECTORAL AND WITHIN-COUNTRY COMPARISONS • Within-Country Institutional Diversity and Employment: The UK Pharmaceutical and Food Manufacturing Sectors Compared; Enda Hannon, Katie Truss, Kathy Monks, Edel Conway, Graine Kelly & Patrick Flood • Political Congruence in Trade Unions: A Factor in Renewal?; Martin Upchurch • Quality of Work in the Cleaning industry: A Complex Picture Based on Sectoral Regulation and Customer-driven Conditions; Vassil Kirov, Monique Ramioul & Jan Van Peteghem

376pp April 2014 Paperback 9781137322272 $46.00 (C$53.00)

Critical Perspectives on Work and Employment

New
Applied International Trade

2nd edition

Harry P. Bowen, Queens University of Charlotte, USA, Abraham Hollander, University of Montreal, Canada and Jean-Marie Viaene, Erasmus University Rotterdam, The Netherlands

‘Clear exposition, thorough explanation, up-to-date empirical information and fresh insights. Unrivalled in its market.’ - Charles van Marrewijk, Utrecht University, The Netherlands

This fully revised and updated second edition offers a comprehensive approach to the methods of international trade analysis. By focusing on the application of theory, the book illustrates the ideas while identifying the implications and weaknesses of the various theories and models found through empirical implementation.

568pp April 2012 Paperback 9780230521544 $79.00 (C$91.00)

Introduction to International Economics

2nd edition

Henk Jager, University of Amsterdam, The Netherlands and Catrinus Jepma, University of Groningen, The Netherlands

‘An increasing number of business people are confronted with aspects of international economics, such as exchange rate movements, capital flows, the functioning of the European Economic and Monetary Union, and trade flows. This book provides the much-needed non-technical introduction into the field.’ - Eelke de Jong, Professor of International Economics, Radboud University Nijmegen, The Netherlands

An accessible introduction to international economics for students from a non-economics background. Its European focus and emphasis on real world examples mean it is well suited to a business-oriented approach with examples from a number of different sectors to help cement understanding of key concepts.
